Entitled : ASSISTANCE AND EMERGENCY DRIVE FOR
ELECTRICALLY-DRIVEN ACCESSORIES

Inventors : BOUILLER Philippe, FRANCHET Michel, RUIS
Jean-Pierre

Assignee : SNECMA MOTEURS

ABSTRACT OF THE DISCLOSURE

The invention relates to a system for driving an accessory, such as a fuel pump or an oil pump in a turboengine, said system comprising an electric motor and further comprising an air turbine associated with said electric motor. Said air turbine is suitable for being fed with a flow of air taken from a compressor of said turboengine and contributing to driving the accessory. The system also includes a valve for controlling the flow of air taken from the compressor, which valve is in the closed position while the turboengine is starting.
